

UKI FLOORING

Congratulations to UKI Flooring for scooping the 2007 Services to Industry Award! Chosen from many of their ilk, UKI has stood head and shoulders above the rest for its commitment to customer service, diligence to Health and Safety issues and being a good all round team player! Jake Brannon, Managing Director of the company told me he was pleased to accept the award and was a benchmark for the continuing success of his company!

UKI Flooring has been established for approximately 20 years and mainly works laying floors for the industrial sector. In fact 87% of their trade comes from it. They lay resin screed and coatings which produces an anti-slip, durable surface for a large number of applications including schools and the food industry; they also make sure that the drainage systems when laying the floorings are in good working condition.

UKI Flooring is now moving into the commercial sector, for example laying floors for restaurant kitchens. They can lay concrete sub floors,

screening to falls and pipe work. UKI lay resin and concrete curbing, stainless steel curbs and wall finishes, to all areas both industrial and commercial.

HOW PROFESSIONAL ARE UKI FLOORING?

What better than living testimonials from a group of very satisfied clients!

John Huggell owner of Restaurant Alimentum in Cambridge has had UKI Flooring carry out flooring works to the kitchen, cold rooms and the whole of the back of house. His restaurant is new in Cambridge and this is what he had to say about UKI:

Exceeding the customers expectation is the hallmark of any successful business and I have been nothing but impressed with the quality of the workmanship and the positive can-do attitude from the people at UKI Flooring. It is so refreshing to work with professionals that deliver the goods on time, on budget and with the minimum of fuss and disruption to the working environment. I would have no hesitation in personally recommending the services that UKI Flooring offer.

Derek Bailey, Chief Engineer of Gunstones Bakery [Northern Foods] has had extensive flooring projects carried out by UKI Flooring over the last 7 years, including: over 2000 square metres of sandwich production hall flooring, sushi production flooring and Christmas pudding production flooring. The work also included new underlay screed to falls, new stainless steel drainage channels and anti-slip resin floor finish. UKI Flooring also fitted 700 square metres of packing and dispatch resin anti-slip floor finish, 400 square metres of freezer floor replacement, including removal of over 250 tonnes of old failed concrete floor, new heater matting and insulation. The job was then finished with power-floated concrete slab with dust sealer.

Derek told me that UKI Flooring has undertaken a variety of jobs for the company from very small repair to flooring jobs right through to laying whole floors. He has found them very helpful, professional, and very keen on the health and safety aspect of their work at all times and are very proactive.

Matthew Walker, part of the Northern Foods Group has had a great deal of work done on site at Heanor, Derbyshire, by UKI Flooring, ranging from supply and installation of stainless steel drainage systems, wall cladding and stainless steel kerbing. UKI have also laid base screeds with a range of industrial floor toppings.

Paul, Engineering Supervisor, told me that he is very pleased to offer a testimonial to Corporate Times regarding UKI Floorings very professional work.

"Their work is outstanding; when a quote is requested they will offer a very detailed appraisal of the work to be carried out and will provide the quote in a short space of time. This is beneficial because we have time limits and a quote may have to be taken to the next meeting. Jake knows the industry and what is required regarding health and safety, alongside the very high standards of hygiene set out in the food industry."

"Preparation is all important for the jobs

they undertake, time spent screening and sealing areas can save time in the long run and prevent the possibility of contamination."

"The work is carried out to the letter in a safe, clean and professional way. UKI often exceeds the work targets regarding time by winding up the job sooner than the completion date, freeing up the area for production to begin again."

"I have known Jake for some time now and we have an extremely good working relationship. Jake isn't fazed by management meetings; he is a great communicator and is often found having face to face meetings with staff in production. Over the last few years Jake has developed a very good working relationship with key Production and Engineering staff."

"I have no hesitation in recommending Jake and his team. We produce high quality products for major retailers and cannot afford to take chances regarding our reputation. We look forward to a long association with UKI Flooring and wish to congratulate Jake on this award!"

UKI Flooring is proud of its work and so it should be, certain standards have to be maintained throughout industry, more so in the food sector and UKI have managed to maintain high standards, professionalism, integrity and a pragmatic attitude that goes before them.
